

Rails for interior installation

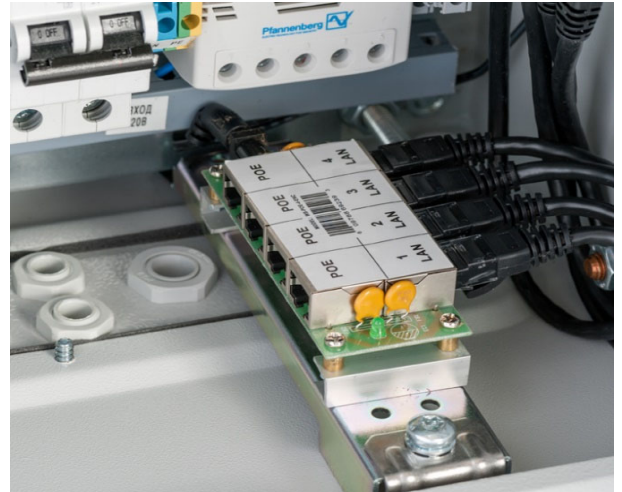

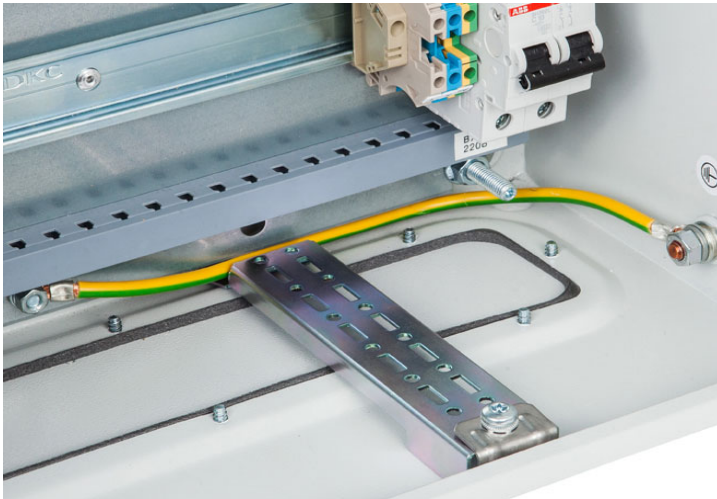

The NSBon-00 mounting kit is designed for simple and quick installation of additional accessories inside the NSB-xyxy series electrical enclosures. When using the NSBon-00 kit, no mechanical modification of the cabinet is required, for example, additional holes or opening. Additional equipment is mounted on any interior side surface of an enclosure. Installation kit material is zinc-plated sheet steel. Two rows of system perforations provide additional flexibility in the installation of various equipment.

The NSBon-00 mounting kit is recommended and used to install the following accessories:

- Fiber Optic Distribution Frame (ODF);
- 24VAC power systems NSBon-31/32/33 (transformers);
- Door-operated switch NSBon-05;
- Holder for a cable hose or bundle of cables;
- Vertical system chassis;
- Additional customer equipment;
